ATLANTA (July 3, 2020) – With an initial 2,505 registered participants, accessing 92 technical sessions, live forums with speakers, leadership updates and networking events, the 2020 ASHRAE Virtual Conference is proving to be a huge success.

The 2020 ASHRAE Virtual Conference includes an on-demand program which started on June 22 and provides participants with access 18-month access to 80+ pre-recorded technical sessions, including 200+ presentations. The four-day live virtual event took place from June 29 thru July 2 and featured technical sessions addressing the latest information relating to the COVID-19 pandemic, along with other industry related topics. Committee members also participated in meetings of technical, standards and standing committees, developing guidance for the future of the industry and ASHRAE.

“We are very pleased with what turned out to be a seamless shift from our in-person annual conference to a virtual format,” 2020-21 ASHRAE President Charles E. Gullledge, P.E. “The feedback we’re receiving from attendees is very positive as our Society continues to lead the industry towards a healthy and sustainable built environment for all, by providing solutions to current engineering challenges.”

Free technical guides or summaries of ASHRAE standards
Day one of the live event included a farewell message and a State of the Society address from 2019-20 ASHRAE President Barry K. Boyce, P.E. Interaction and participant engagement remained high throughout the day, with technical sessions on off-site construction, **grid-interactive efficient buildings and sustainable development opportunities in the wake of the COVID-19 crisis.**

Access to industry research and publications
On day two of the live event, during his Secretary’s Report, Executive Vice President Jeff Littleton reported record participation in ASHRAE’s e-learning training, increased volunteer involvement and updates on ASHRAE’s new Global Headquarters.

Career resources (mentorship, job boards, certifications)
“I’m happy to report that the renovation of your new Society headquarters building is on schedule for substantial completion at the end of August and relocation in September,” said Littleton. Industry support for ASHRAE’s new HQ building has been fantastic. In total, \$10.5 million has been donated -- \$6.5 million in cash and pledges, and another \$4 million in in-kind equipment and services. Thank you to all of the companies and individuals that have supported the Society’s new HQ building.”

Retiring board members were honored for their service on day three and technical sessions continue to explore how building and energy systems interact and respond to climate change challenges. The 2020-21 board and officers were also introduced.

On the final day of the conference, President Gullledge gave his address on the Society theme for the coming year,

The ASHRAE Digital Lighthouse and Industry 4.0.

“Digital transformation is not simply associated with adopting new technical solutions. Knowledge needs to be captured and linked in such a way that ALL relevant stakeholders’ benefit,” said Gullledge. “Doing so requires understanding of how to collect, store and analyze data, so that it is insightful and actionable. ASHRAE will lead the industry in becoming a part of the digital transformation that will guide the building industry into the next decade and beyond.”
