Travel & Exposure Related Isolation / Quarantine

Those who have traveled to the following locations need to quarantine for 14 days after arrival in Kansas. This applies to both Kansas residents and those visiting Kansas:

- Alabama
- Arizona
- Arkansas
- Florida
- South Carolina
- Cruise ship or river cruise passengers
- International travelers

 Map of world with lines indicating travel

The travel list was updated June 29 and will be updated/reviewed in approximately two weeks.

These mandates do not apply to people who work in critical infrastructure sectors needed to continue operations during this pandemic, such as public health, hospitals, clinics, pharmaceutical and food supply, along with others as defined by the Department of Homeland Security. While KDHE strongly recommends these quarantine restrictions for everyone, we do recognize that services need to continue. KDHE encourages facilities to ensure they have updated their Emergency Preparedness Plans and implement protocols to ensure that no employee comes to work symptomatic.
